

Hello:

Welcome to AP Physics

We have a great amount of work to do this year.

here is the link to the textbook

<http://xn--webducation-dbb.com/wp-content/uploads/2019/01/Raymond-A.-Serways-and-Jerry-S.-Faughns-Holt-Physics-PDFDrive.com-.pdf>

You may want to refer to some online sites for extra explanation and help:

Khan Academy <https://www.khanacademy.org/>

Youtube search for topics

Phet <https://phet.colorado.edu/>

Physics Classroom <http://www.physicsclassroom.com/>

Fear of Physics <http://fearofphysics.com/Videos/>

And.. <https://www.class-central.com/report/physics-free-online-courses/>

(this a huge resource of places to look)

I would also suggest the Barron's EZ guides for Physics or the AP Physics 1 review book. Though the EZ guide is more comprehensive in it's information.

**You are responsible for the first THREE chapters. all of the questions, problems, etc.**

I will be adding announcements to this site as the summer goes and will hopefully be uploading video from me on problem solving and basic math manipulations.

If there are any question do not hesitate to contact me at
