

Welcome to Norwalk High School!

You are about to embark on the next journey in your educational career. We are looking forward to a year-long adventure with you in Algebra 1.

This packet contains topics that you are expected to know prior to entering Algebra 1. You have learned these skills over the past few years. These examples focus on both mathematical skills and problem solving. This packet should be completed independently.

Just like the redesigned SAT, some sections will require the use of a calculator, while other sections a calculator is prohibited. In the directions, it will say if you are not allowed to use a calculator. If you are having a difficult time adding, subtracting, multiplying and dividing numbers, we suggest you study this over the summer. For example, flashcards can be used to help with basic facts. Also, you can use Khan Academy, Purple Math or Google to refresh on these topics.

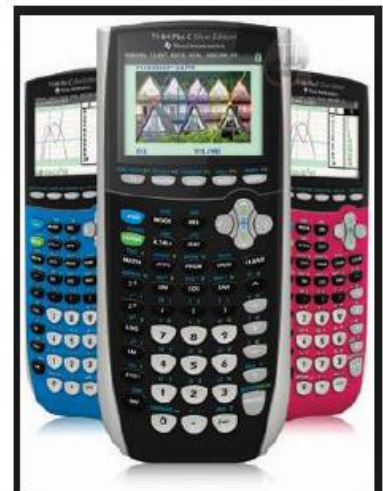

The summer packet is due the first day of class. You are to complete this assignment **in pencil** and show all work. **Your first test** of the school year **will also be on the first day of class** and will cover the topics that you are expected to know entering 9th grade.

For the 2018-2019 school year, you will be required to bring the following supplies to class every day:

1. TI-84 Plus or TI-84 CE graphing calculator
2. $1\frac{1}{2}$ inch 3-ring binder with 8 dividers
3. Red pen
4. Mechanical pencils
5. Loose leaf paper
6. Colored pencils

Enjoy your summer!

Please return this signed form on the first day of class.
