B) $y = x + 1$  
C) $y = 1$

7) Which is the equation of a **vertical** line passing through the point $(5, 2)$?

A) $x = 2$  
B) $x = 5$  
C) $y = 2$  
D) $y = 5$
Example: Write the equation of the line passing through the point (3, 1) with slope 2.

Solution: We are given the slope \( m \) is 2. We need to find the \( y \)-intercept \( b \).

\[
y = 2x + b \quad \text{write equation}
\]

\[
1 = 2(3) + b \quad \text{substitute 3 for } x \text{ and 1 for } y
\]

\[
1 = 6 + b \quad \text{simplify}
\]

\[
-5 = b \quad \text{subtract 6 from each side}
\]

Since \( m = 2 \) and \( b = -5 \), we can then write the equation \( y = 2x - 5 \).
