

## WorkSafe App

### QR Code COVID Screener Process

To date, hybrid students have come to NHS with their paper “COVID screener” completed. Staff at the entrance doors read the responses and allow students to enter. Now, there is an App called WorkSafe for students to complete the COVID screener on their phones and show us the results. See attached PDF file.

**When students scan the QR code in the pdf, they'll be able to download the app.**

After students download the app, they'll be able to go directly to the screener, to answer the questions, and then show us the completed screener on their phones when they enter the building. Since we know that not all students have cell phones, we will still accept the paper COVID screeners as well.
